

150,000 - New cases of epilepsy each year

1 in 26 – Will develop epilepsy in their lifetime

1 in 3 – People with no effective treatment

With your help, Epilepsy Foundation New England aims to improve the lives of individuals and families impacted by epilepsy and seizures. Together, we can offer those with epilepsy help for today, and hope for tomorrow.

We're working to help those battling epilepsy from all corners of New England, and we're always reaching out to those just starting their journey. That's why we're putting our knowledge, experience, and community to work for visitors at all stages of the battle against epilepsy. We provide resources and programs for:

Newly diagnosed

Young People

Parents

Seniors

Caregivers

School personnel and more....

Our programs include: Community and Professional Education programs, local Community Resource Rooms, Share groups, a number of Summer Camps, Emergency Aid Assistance, Young Leaders Network, investing in Research and Advocacy. You can [visit our website](#) to find out more about our growing list of programs.

[Click here](#) to become an Epilepsy Advocate - Our team of parents, patients, doctors, healthcare experts, researchers, and New Englanders all play a big role in our progress. Want to add your voice to the effort? Get involved become an epilepsy advocate and let's put an end to epilepsy throughout New England, together.

We come together throughout the region to support each other and the work of EFNE. You can find how to participate in our local and regional activities, including our many Walks for Epilepsy, on our [events page](#).
